# Teodor Ilie

Curriculum Vitae

98 Cadorna Avenue, Toronto, ON, M4J3X2

(416)-668-6650 | teo.altum.quinque@gmail.com | teoilie.com | Teollie | teodorilie

## Education

### Queen's University

*September 2024 - Present*

Master of Science, Computer Science — *Kingston, ON, Canada*

- GPA: 4.3/4.3
- Researched autonomous vehicles, robotics, ML, control systems, and Unmanned Ground Vehicles under the supervision of Dr. Sidney Givigi
- Funded by top 3 scholarships: Vector Institute, NSERC CGS, and NSERC OGS

### Queen's University

*September 2018 - August 2022*

Bachelors of Computing (Honours) in Computer Science — *Kingston, ON, Canada*

- GPA: 4.0/4.3, Dean's Honour List every academic year
- Relevant coursework: Data Analytics (A+), Artificial Intelligence (A), Data Structures (A+), Algorithms (A+), Software Architecture (A+), Logic (A+), Discrete Math (A+), Linear Algebra (A+), Calculus (A+), Statistics (A+), Introduction to Computer Science (A+), Advanced Spanish (A)

## Skills

| | |
|---|---|
| **Programming** | Python \| Java \| C++ \| HTML \| SQL \| PHP \| JavaScript \| VBA \| Prolog |
| **Technologies** | Git \| Spring \| Angular \| Jira \| Confluence \| MS Power BI/Power Automate \| MS Office \| Final Cut Pro \| Adobe Photoshop |
| **Interests** | Violin \| Guitar \| Visual art \| Photography \| Muay Thai \| Jiu Jitsu \| Boxing \| Choir \| LEGO Technic Engineering |
| **Languages** | English \| French \| Spanish \| Romanian |

Demo

## Work Experience

### BMO Financial Group

*September 2022 - Present*

Full-Stack Software Developer — *Toronto, ON, Canada*

- Developed an internal safekeeping app "SKOPE" using RESTful Spring APIs in the Back-End, and Angular Front-End, in an Agile team
- Leveraged JUnit unit testing, Git, TDD, automated Postman testing, and Maven API deployments, to deliver high-quality software
- Performed advanced analysis and design tasks to optimize codebase, reducing unit test size by 50%
- Presented innovative AI cash flow forecasting solution to senior executives, using an ARIMA model, AWS, and Jupyter notebooks

### BMO Financial Group

*May 2021 - August 2021*

Business Analyst — *Toronto, ON, Canada*

- Spearheaded the design of an automated reporting tool using Microsoft Power BI and Power Automate that improved efficiency by 1000%
- Networked online with leading teams across the bank, including the Technology Research & Innovation Team, to deliver the best product
- Conducted knowledge sharing workshops with my team and management to allow my tool to be used bank-wide after my term

### BMO Financial Group

*May 2020 - August 2020*

Business Analyst — *Toronto, ON, Canada*

- Coordinated month-end systems monitoring bridges by connecting bank-wide teams; reported hourly health checks to Senior executives
- Led weekly change meetings, connecting Product and Business teams across the business, using ServiceNow, JIRA, and Microsoft Teams
- Increased daily reporting efficiency by 200% for my team through automation, using Excel and Microsoft Virtual Basics coding

## Awards

### NSERC Ontario Graduate Scholarship
*2025-2026*

Queen's University, NSERC — *Kingston, ON, Canada*

- $15,000 merit-based scholarship to support exceptional students in AI-related master's programs

### Vector Scholarship for AI Research
*2024-2025*

Vector Institute — *Kingston, ON, Canada*

- $17,500 merit-based scholarship to support exceptional students in AI-related master's programs

### NSERC Canada Graduate Scholarship
*2024-2025*

Queen's University, NSERC — *Kingston, ON, Canada*

- $17,500 scholarship to support high-calibre students with a high standard of achievement in undergraduate and early graduate studies

### Dean's Honour List
*2018 - 2022*

Queen's University — *Kingston, ON, Canada*

- Awarded every year of my Bachelor's for a GPA greater than 3.5/4.3

### BMO Student of the Term Award
*August 2020*

BMO Financial Group — *Toronto, ON, Canada*

- Awarded for one of top 3 nominees out of 240 interns, awarded by the Campus Recruitment Team for strongest contributions to the bank

### NSERC Undergraduate Student Research Award
*July 2020*

Queen's University, NSERC — *Kingston, ON, Canada*

- Awarded $6,000 grant for excellence in undergraduate studies and research aptitude

### Principal's Scholarship
*September 2018*

Queen's University — *Kingston, ON, Canada*

- Awarded $7,000 scholarship on the basis of academic excellence, to students who are in the top 5% of the competitive admission average

### Dr. T.M. Porter Scholarship for Mathematics
*July 2015*

University of Toronto Schools — *Toronto, ON, Canada*

- Awarded for excellence in undergraduate studies and research aptitude

### Canadian Computing Contest 1st Place Regional Winner
*February 2014*

University of Waterloo — *Waterloo, ON, Canada*

- Awarded for a perfect score on this computer science competition

### DECA Hospitality and Tourism Section Regional Qualifier
*February 2014*

DECA — *Toronto, ON, Canada*

- Qualified for the national competition
- Developed communication skills and the ability to deliver compelling speeches

## Projects

### Active SLAM with Deep Reinforcement Learning 🔗
*January 2025 - April 2025*

Reinforcement Learning, Computer Vision, Deep Learning

- Built an Active SLAM system for autonomous navigation using ROS2, Gazebo, SLAM Toolbox, and PIC4RL on a Clearpath Jackal robot.
- Designed a novel reward function with logarithmic scaling, improving DRL training speed by over 50%.
- Implemented and benchmarked state-of-the-art RL algorithms (PPO, SAC), achieving faster convergence and superior exploration with SAC. Demo 🔗

### Neural Network Digit Classification 🔗
*January 2021 - April 2021*

Python, Neural Networks

- Designed and implemented a Neural Network model in Python to correctly classify handwritten digits, using the MNIST dataset
- Gained an in-depth understanding of Neural Networks by programming the linear perceptrons and connections from scratch
- Experimented with loss functions, hidden layers, and activation functions, to achieve peak accuracy performance of 97% on the test dataset

### Presidential Speech Efficacy Prediction 🔗
*September 2020 - December 2020*

Machine Learning models (SVM, Neural Network, Random Forest, kNN, Bayesion), Excel, KNIME

- Applied Data Analytics concepts like clustering and prediction to predict the efficacy of presidential candidate speeches with 94.6% accuracy
- Performed clustering using PCA, DBSCAN, and k-means, and visualized data in Excel; investigated accuracy using Bayesian, k-Nearest Neighbour, Neural Networks, Random Forests, and Support Vector Machines models in Jupyter Notebook and KNIME
- Determined key targets for writing compelling speeches, such as top 10 words, and investigated the role of deception in winning debates

### Tetris Game 🔗
*January 2015 - May 2015*

Java, Abstract Window Toolkit API, Object-oriented programming

- Developed an interactive Tetris game, using object-oriented programming in Java, double-buffering, and the Java AWT API to render the GUI

## Volunteer Experience

### Bit-by-bit Computer Science Camp Volunteer

*2014*

Western University

*London, ON, Canada*

- Taught programming through LEGO Mindstorms to children, from beginner to advanced sections

### ProVita Orphanage Volunteer

*2019 - Present*

ProVita

*Valea Plopului, Romania*

- Helped build new houses to expand accommodation
- Organized music workshops and sports activities for the children
- Acted and translated subtitles for promotional videos
